STARHACKS II
#BUILDINGBRIDGES

Women make up less than 20% of the tech workforce. In a world fueled by technological innovation, the lack of diversity in the tech workforce has embedded one fatal flaw into our future: technology simply does not accurately reflect the world it is meant to work for.

StarHacks is an all-female and nonbinary high school and collegiate global and virtual hackathon, here to break the mold of what a person in tech looks like one hackathon at a time. In 2021, we hosted our first hackathon with over **800 registrants and 36 hours of hacking**, empowering female and nonbinary hackers of all coding backgrounds.

For our second year, we are #BuildingBridges: bridging divides, venturing into uncharted territory, finding unity as we pioneer into new frontier. Through code and community, our core mission is to create an environment for the world's brightest thinkers to empower and be empowered, building the bridge to a more inclusive future — and we would love for you to be a part of it.

Our sponsorship tiers are listed below, and we are happy to state that StarHacks has **501(c)(3) status**. All sponsorships will go towards our hackathon experience, swag, and prizes. Please contact us with any questions. We look forward to working with you!

Thank you!
